TASK 2 – DAY 5 STUDENT GUIDE

Focus: Add value to your system and strengthen evidence

Your Goal Today

- Add **meaningful improvements**
- Strengthen **accessibility and usability**
- Improve **testing evidence**
- Create a **clear README.md**

Important Mindset

Only extend your system if your current features are working.

THE TASK 2 LOOP

(Same as previous days – continue using it)

STEP 1 – Add One Meaningful Feature (60 mins)

Core option (recommended):

- improve existing features
- improve usability
- improve validation

Extension option (if confident):

- multi-table feature
- linked data display

- dashboard-style view

STEP 2 – Accessibility Improvements (45 mins)

Check:

- labels on inputs
- readable text
- colour contrast
- keyboard navigation

Test and record:

- add to test plan
- link video
- update testing.md

STEP 3 – Performance and Error Testing

Test:

- large data inputs
- invalid inputs
- missing inputs

Record:

- test plan entry
- video evidence
- testing.md

STEP 4 – Create README.md (Important)

Include:

- project description
- features
- how to run

- folder structure
- where evidence is stored

🎥 Record a short overview video

STEP 5 – Update Documentation

testing.md

- all recent tests

versioning.md

- new features and improvements

Writing Framework

- what you added
- why it helps the user

STEP 6 – AI and External Help

Record clearly:

- what you used
- how you used it
- what you changed

EXTENSION (Higher Band Students)

- multi-table relationships
- deeper accessibility improvements
- performance optimisation
- stronger test coverage

SUPPORT FOR STUDENTS WHO ARE STUCK

Focus ONLY on:

- improving current features
- completing testing properly
- writing clear evidence

END OF DAY CHECKLIST

- Feature added or improved
- Accessibility improvements made
- Test plan updated
- testing.md updated
- versioning.md updated
- README.md created
- Evidence recorded

Final Reminder

Quality improvements matter more than adding lots of features.
