TASK 2 – DAY 6 STUDENT GUIDE

Focus: Finalise your system and secure your marks

Your Goal Today

- Ensure your system **works fully**
- Complete all **documentation**
- Show clear **evidence of testing and improvement**
- Prepare your project for submission

Important Mindset

Today is about finishing well, not starting new features.

THE TASK 2 LOOP

Use it for final checks and fixes

STEP 1 – Check the Requirements (20–30 mins)

Ask yourself:

- Does my system meet the scenario?
- Is anything missing?

👉 Make a short list of small fixes only

STEP 2 – Complete Final Fixes

Fix:

- small errors
- missing validation
- layout issues

🎥 Record:

- Test 27 – Final Fixes

🟢 STEP 3 – Final Full-System Test

You must test:

- CRUD
- validation
- responsiveness
- user journey

Record:

- Test plan entries
- testing.md updates
- full walkthrough video

🟢 STEP 4 – Complete Documentation

Writing Framework

- all sections completed
- short, clear statements

testing.md

- full test coverage
- expected vs actual

versioning.md

- clear changes over time

Appendices

- AI usage
- GitHub references

STEP 5 – Finalise README.md

Ensure it is:

- clear
- complete
- professional

STEP 6 – Final Check

Check:

- file names
- folder structure
- video links
- clarity of writing

STEP 7 – Final Reflection

Write:

- what your system does
- why it meets the scenario
- what improved through testing

SUPPORT FOR STUDENTS WHO ARE STUCK

Focus ONLY on:

- working CRUD
- basic validation
- clear documentation

EXTENSION (Higher Band Students)

- polish UI
- improve performance
- refine explanations
- strengthen evidence

END OF DAY CHECKLIST

- System fully tested
- All documentation complete
- All evidence linked
- README complete
- Final checks completed

Final Reminder

A complete, clear project will score higher than an unfinished complex one.
